

Communal Coin Cycle

Note = (**NoteId** = { Lifetime, BirthDate, Value(in BirthDate), Counter, MaxCounter } , **NoteCode** = { random }), where Counter is of the coin out of all same age coins \leq MaxCounter

Age = UpdateTime – BirthDate \leq Lifetime

Ratio = Age / Lifetime

Gradient = MaxCounter / peers_number

Price = (1 – Ratio) * Value

Dividend = Ratio * Value * Gradient
